

Lebanon's "NAMA" on Transport

-14% CO2 emissions
2030

AIM To reduce emissions from transport through replacing old cars by fuel-efficient vehicles

Nationally
Appropriate
Mitigation
Action

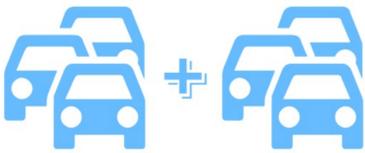

THROUGH Establishing a scrappage programme for all cars older than 15 years

Phase 1
2019-2020
Pilot phase of scrappage

Taxis

Phase 2
2020-2030
Scaling-up scrappage

Taxis + Passenger cars

All scrapped cars will be replaced with fuel-efficient cars

Building blocks of the NAMA

- Car scrappage program** Designing a car scrappage and replacement program to replace old and fuel intensive vehicles
- Institutional framework** Setting up and operating a framework for managing and operating the project
- Legal and regulatory framework** Establishing an incentive scheme for car owners to switch to cleaner vehicles
- Promotion of Fuel-Efficient Vehicles** Creating a market awareness for cleaner vehicles
- Capacity building of key stakeholders** Empowering decision makers
